

Master Decision Tree

Don't know which of the 66 standard profiles best fits your application? Just start at the left and begin answering the basic application questions in the decision tree. Follow the tree through, and it will guide you to the profile that should be the best fit for your application.

The decision trees in this guide are to be used as an engineering guide only. Often several other parameters must be considered to optimize seal design. Contact Parker's PTFE Engineering Team for confirmation of your choice or further recommendations. Parker also recommends that any seal be tested in the application conditions before releasing for production.
